A Salesman sells many cars

Functionality of the web site:

This is my dynamic website based on the topic where a salesman can sell zero or many cars.

This website is intended for use by the Sales Manager at a car dealership.

Salesmen are allocated a number of cars to sell and commission is calculated based on every sale the salesman make. Commission is set at 10% of the selling price of the car.

The website allows the Sales Manager to interact with the database of cars and salesmen tables by giving access to:

1. Display records from the database including images
2. Add Cars and Salesmen
3. Upload images associated with each car or salesman
4. Delete car or salesman records
5. Update and edit car details
6. Update and edit salesman details
7. Show a list of all cars at the garage
8. Show a list of all salesmen and their details
9. View calculated Commission on each Salesmen
